

## Concentrated neutral rinse aid

### Description

Suma Revoflow Perfect A17 is a concentrated low foam general purpose rinse additive for machine ware washing.

### Key properties

Suma Revoflow Perfect A17 is a concentrated neutral rinse additive. It has been specially formulated for use in a wide range of ware washing machines. The special blend of non-ionic surfactants is designed to lower the surface tension of the final rinsing water. This prevents droplet formation, and because the water sheets-off the surface in a thin layer, drying times are also reduced. This special blend also prevents heavy foaming in the dish wash machine. Suma Revoflow Perfect A17 is effectively dosed with the Diversey Revoflow system, which combines excellent performance, safety and convenience.

### Benefits

- Highly concentrated formulation gives economy in use
- Ensures quick drying
- Gives streak and spot-free results
- Low foaming action for more efficient operation
- Convenient pack is easy to handle with less plastic waste
- No contact with chemicals due to innovative packaging design

### Use instructions

Suma Revoflow Perfect A17 is recommended for use in all types of automatically dosed commercial ware washing machines. It is recommended to use at a minimum recommended dosage of 0,1ml/l\* at temperatures of 70-80°C in soft to medium hard water conditions. The product is directly injected into the final rinse water, using Diversey Revoflow dosing equipment.

Actual dosage will depend on site conditions (water hardness, degree of soiling, procedures).

Attempt to wash full machines whenever possible

Avoid under or over dosing the detergent

Wash at the lowest temperature possible resulting in hygienic dishes

\*This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.
