

33B1

Detergent - without bleach

Description

Clax Mild is a complete enzymatic liquid mainwash detergent specially formulated for use in commercial, hospital and on premise laundries. The product has been designed for automatic and manual dosing and can be applied in medium to hard water, at 30-60 °C. Clax Mild is suitable for washing all (coloured) cotton and polycotton fabrics.

Key properties

Clax Mild is a low alkaline, mild product, based on an effective blend of surfactants, water hardness sequestrants, anti-greying agents and enzymes. The effective building system ensures low water hardness ion concentration and consequently prevents precipitation of detergent components. The product also contains anti-greying agents which keep soil particles in suspension (prevents re-deposition). Clax Mild has been formulated with a blend of surfactants ensuring good particulate and fatty/oily soil removal. The presence of proteolytic enzymes leads to protein degradation, thus facilitating efficient targeted removal of proteinaceous soil such as blood and food stains. Clax Mild is mainly used as a single shot mainwash detergent. However, it may also be applied in conjunction with an alkali booster (for heavily soiled fabric) or with a bleach / disinfectant. Clax Mild is used for cleaning (coloured) fabric from hospitals and other healthcare establishments, hotels and restaurants. In addition this product is suitable for washing microfiber mops and cloths and other delicates.

Benefits

- Excellent performance on a wide range of stains and types of soil
- Prevents greying of linen; stabilisation of soil particles in the wash liquor
- Very effective on proteinaceous soil (e.g. blood and food stains)
- Suitable for washing delicates and coloureds
- Safe to use on microfiber cloths and mops

Use instructions

For best results:

- 1. Use softened water,
- 2. Segregate polyester cotton articles from other articles and wash separately,
- 3. Separate white and coloured goods,
- 4. Sub-sort into light, medium and heavily soiled articles.

Dosage*

Dosage recommendation in ml/kg dry goods (subject to wash classification):

- Soft water (8 °dH): 4-7 (low soil level), 7-10 (normal soil level)
- Medium hard water (8 15 °dH): 7-10 (low soil level), 10-13 (normal soil level)
- Hard water (> 15 °dH): 10-13 (low soil level), 13-16 (normal soil level)

For heavily soiled items and for use of Clax Mild in combination with a bleach/disinfectant, contact your local Diversey representative.

*This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.
