

Good Sense® Automatic Dispenser

Smart solution to solve your malodour problems – continuous action

Good Sense Automatic Dispenser and refill cartridges:

- Adjustable settings
- Unique propellant system
- Effective malodour removal Odour Neutralizing Technology (O.N.T.)
- 1 refill lasts up to 56 days

Compact stylish dispenser

Good Sense automatic dispenser is a system which automatically sprays high quality air care products via one compact, modern and lockable dispenser. It is easily fitted to any surface, either with integral self-adhesive pads or with the screws provided.

The automatic dispenser is a battery powered unit which sprays quality air care products at regular intervals. It requires less power and is supplied with 2 AA batteries, lasting up to 18 months.

Unlike conventional dispensers, it sprays at very limited intervals, which is your choice between 1, 2 and 3 hours according to the odour intensity you wish.

Depending on the setting, the dispenser will provide up to 56 days of air control without the need for any maintenance.

A simple luminescent cell will let you know when the time has come to replace the cartridge.

A keyless locking system ensures that the cartridge is protected without the risk of lost keys.

Simplicity and cost control for air care

The dispenser contains super concentrated refill cartridges containing 45% perfume (compared with an average of 2.5% for conventional aerosols).

Our advanced technology in concentrates allows spray frequencies up to six times lower than conventional units, delivering up to 56 days of odour control.

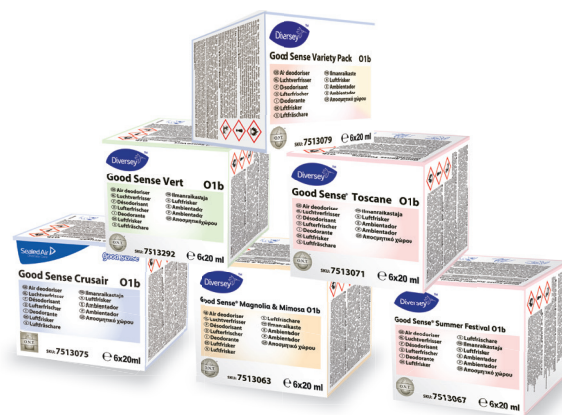

Cartridges can be changed within seconds.

Easy and safe to use, the dispenser is the ideal solution to effectively solve malodour problems.

Unique photocell feature

Unlike conventional units which spray often and non-stop, the photocell option allows the dispenser to simply go into a sleep mode whenever the room is put into darkness. No more useless sprays over night or when the area is not used. The photocell can be turned on and off by a simple switch.

This patented feature expands the life of each refill without compromising the quality of your environment. The Good Sense automatic dispenser is the perfect option to solve your odour problems permanently, economically and automatically.

Good Sense® Automatic Dispenser

Assured quality, choice and flexibility

Good Sense refill cartridges are available in a choice of 4 different fragrances including a combo pack to give you the possibility of changing the created atmosphere regularly.

Effective malodour removal with O.N.T.

All of our refill cartridges, except Summer Festival, use patented O.N.T. Technology, proven to be more effective than standard odour counteractants. Unlike conventional air fresheners which mask malodours, O.N.T. active molecules literally chemically destroy malodour molecules, enhancing the perception of the perfume. In parallel, it eliminates malodours and leaves the area with a better scent for longer.

Product	Pack size
 Good Sense Vert – cool and floral Fresh green apple top notes intermingled with a hint of bergamot and orange that rest on a fruity heart softened by accords of raspberries nestling into a woody musk base. 100% sweetness of a green apple!	2 x 6 x 20 ml
