### SYSTEM

Flat mop system with double sided frame, to be used with pre-soaking, soaking on demand with soaking station or with the convenient wringer  
Ideal for recurring washing of smooth surfaces

### GREEN BOX

#### DECITEX of the fibres

Microfibre: 0,16 DTX

**Efficient:** microfibre requires less chemical to remove dirt and bacteria, reducing water and chemical consumption

100% cleaning material, no waste along the whole product's functional life

Tri Wet 1 mop is classified as having a low release of microplastics during washing (test conducted according to DIN EN ISO 4484-1 and 4484-2 by a specialised external laboratory)

## Advantages

- **Time-saving:** you double the cleaned surface thanks to the flat mops with two cleaning sides
- **Easy:** mop changing is easy and quickly
- **Highest hygiene:** microfibre penetrates into the microporosity of the floor, collecting dirt and more than 95% of bacteria
- **Touch-free:** the detaching system avoids any contact with the dirt
- If used with the pre-soaking system, you cut the quantity of necessary mops in half thanks to the two cleaning sides
- If used with the wringer, you go back to the bucket to rinse and wring out the mop half the times as the two cleaning sides of the mop double the dirt collection power

## Material

85% polyester, 15% polyamide

## Washing conditions

### Guidelines for proper fibre maintenance

Follow the washing instructions (temperatures and dosage) on the laundry detergent packaging  
Perform a pre-wash in cold water without laundry detergent to remove any residual product used during cleaning operations  
Recommended use of professional textile laundry detergent  
Do not use fabric softener  
Do not use laundry detergents with Ph > 11  
The use of laundry nets is recommended to speed up and make laundry operations more hygienic

## Specific mop instructions

Washing temperature max 90° C, recommended 60°

Bleaching possible, do not use chlorine

Tumble dry or in a dryer possible with low program
